

The European Union enlarges and reduces social rights. That is the final assessment the network of the European Marches against unemployment, job insecurity and exclusions have made.

The entrance of ten new countries expands the market and the competition inside a large free trade area without any social regulation: Europe is thus becoming a free zone. The draft constitutional treaty devotes the disappearance of social rights which have been achieved for two centuries on the continent, promoting wage and social dumping, ground of xenophobia.

Only the emergence of a European Social Movement and the massive and active mobilization of all the people, workers, precarious people and unemployed will enable the building of a new future. The active solidarity between the social movements of the 15 and the 10 becomes with the 1st of May enlargement a pressing necessity, for another Europe, for another world.
